LABELING EQUIPMENT SPECIALISTS

QUALITY PRICE SERVICE

EXCELLENCE

Company Profile

The packaging industry grows more complex, demanding and competitive every day. Cost containment and production efficiency are no longer nice to have – they are essential! Companies must find new ways of leveraging each small advantage in their production process by allying themselves with trusted and knowledgeable support partners. That's where we come in.

We are Multi-Tech Systems Int'l Inc. (MTS), the labeling equipment specialist ready to meet your need for efficiency, speed, flexibility and productivity.

Multi-Tech Systems Int'l Inc. is North America's premier provider of innovative Hot Melt, Pressure Sensitive, Cold Glue and Roll Fed Labelers which use the best of North American and European technologies to provide extremely accurate label placement at medium to ultra high speeds.

We are absolutely a full service company. We have the most extensive equipment rebuild program worldwide for the leading global labeling machines. We design, manufacture and supply change part systems and components all under the control of our extensive Quality Assurance Program.

Our highly dedicated staff are thoroughly familiar with the stringent requirements facing our products. Just as importantly, our staff appreciates that our customers are counting on us to get the job done right the first time.

Our continuing growth is the result of our ability to respond to our customer's needs in a rapid and professional manner. We understand the challenges and demands of production and the importance to you of a dependable and responsive supplier. *We strive for excellence in quality, competitive pricing and superior service.*

PRODUCTIVITY
PRODUCTIVITY

MODULAR/ SERVOTECH

The Modular/ Servotech Labeling System is the answer to all labeling requirements. This machine is equipped with servomotors on each bottle platform thus ensuring high performance and easy changeovers. The Modular capability allows the interchanging of many different styles of labeling stations such as Roll Fed, Cold Glue, Pressure Sensitive and Hot Melt by simply interchanging the type of labeling station that is required for the product label application. If your requirements are for a flexible, compact and user-friendly labeling machine, then the Modular/Servotech labeling system is an excellent solution.

ETIROLL – Roll Fed Labeling

The newly developed Etiroll Roll Fed labeler is an advancement in design, technology and flexibility in comparison to similar machines on the market. The Etiroll is designed for quick format changes and value added designs, such as requiring only one unique cutting cylinder for all label sizes that the machine pitch can accept, which is one of many features that separates the Etiroll from its competitors.

ACCUTECH PS – Self-Adhesive

If your requirements call for a fully integrated pressure sensitive labeling system with multiple labels, high labeling accuracy, container orientation, detection/rejection systems and with high outputs, or just a simple application with lower outputs, the Accutech PS line of pressure sensitive labelers are the choice of many companies that require accuracy and reliability, shift after shift.

AUTOTECH CG – Cold Glue Labeling

The Autotech CG line of labelers offers production speeds of up to 1,000 containers per minute, while having the versatility to perform deluxe labeling applications. The speed and versatility of the Autotech CG labelers combined with rugged and robust design makes it the choice of labeling systems.

CANTECH HM – Hot-Melt Wraparound Labeling

The Cantech HM labeler was designed specifically for full wraparound labeling using hot-melt glue. Extremely accurate label placement and precise overlap, the technically advanced Cantech HM series labeler was designed to apply pre-cut paper and film labels at speeds from 3,000 to 64,000 containers per hour.

EFFICIENCY
EFFICIENCY

OPTIONAL EQUIPMENT

Detection/Rejection Systems

Easy Splice Systems

Accumulators

Dual Unwind Stations

Parallel or Right Angle Configuration

Container Orientation

Tamper Evident Banding

Outserters

Coding

Vision Inspection/Rejection Systems

Change Parts Kits

Spare Parts Kits

Change Parts Storage Carts

Pressure Reducing Station for Special Shaped Containers

Special Bottle Table for Special Shaped Containers

Servo Driven Bottle Plate Conversions

Pressure Sensitive Labeling Station Conversions

Auto Lube Systems

Air Injected Bottle (For Rotary Labeler, Labeling Empty PET)

Double Feedscrew and Disengageable (Clutched) Feedscrew

Quick Change, Change Parts

Clamping and Spotting Infeed Starwheels

Separate Conveyor Drive

Maltese Cross Bottle Table for Square and Rectangle Containers

Hot Spray Glue System
